

BLUE JOURNEYS DIVE AND ACTIVITY CENTRE

Our resort is set in one of the most untouched and beautiful islands in the southernmost tip of the Maldives. A full Park Hyatt Maldives Hadahaa experience is not complete unless you have enjoyed some of the local history, been welcomed into a Maldivian home, fished in our tropical waters aboard a Dhoni – our traditional boat - or dived beneath the turquoise waters to fully appreciate the vast underwater world living around our untouched coral reef.

We don't offer *trips*; we provide tailor-made journeys that are nothing less than 100% Pure Maldives.

You could choose to drift to a local island to collect local spices and herbs with the Executive Chef, spend a couple of hours fishing for snappers and groupers onboard the Dhoni to be cooked fresh when you return back to the resort, have a lavish private picnic in a truly remote location on an uninhabited island or set off into the sunset looking for dolphins.

Visit the towering coral reef cities structured like luxury apartments for the kaleidoscopic reef fish. See graceful shoals of fish as they dance in the sunlight and change direction in synchronicity within the blink of an eye. See Clown Fish bask in the secure fingers of the magnificent anemones or spot the wary lobsters pop their heads out of their rocky homes. Watch the Thick-lipped Wrasse, in all its rainbow glory, enjoy its coral lunches and be amazed by the streamlined grace of the Black and White Tip Sharks keeping a watchful eye over their territory.

The marine life sharing our island paradise is more abundant and varied than anywhere else in the Maldives – and best of all, all of it can be seen from the surface of our House Reef or meters underwater in the deeper parts of this marine haven.

There are so many options – all you have to do is tell us what you'd like to see and we'll create an experience just for you.

BLUE JOURNEYS EXCURSIONS MENU

SNORKELING

Guided House Reef Snorkeling

Your experience will start with a presentation from the Resident Marine Biologist during which you will learn to identify the different species and their behaviour, understand the complex reef systems and marvel at the diversity of endangered species and fragile corals. We will then guide you around our house reef, taking you to the best areas and pointing out interesting features.
